

Salem Zakkar

Mobile & Backend Software Engineer

salemzakkar.work@gmail.com | +963934019206 | Portfolio | LinkedIn

Hama, Syria | Open to Relocation & Remote Opportunities

SUMMARY

Software Engineer specializing in mobile and backend development, with experience building production-ready applications and scalable software solutions. Skilled in designing and developing reliable systems across mobile platforms and backend services, with a strong focus on clean architecture, performance, and user experience. Passionate about learning new technologies, staying up to date with industry trends, and continuously improving development practices to deliver high-quality products.

PROFESSIONAL EXPERIENCE

Unifi Solutions, Mobile App Developer 08/2024 – Present | Montreal, Canada - Remote

- **Developed and maintained production-ready** Flutter applications for IoT, medical, and maintenance solutions, focusing on reliability, performance, and scalable mobile architecture.
- **Integrated offline-first architecture with local storage** and syncing mechanisms to ensure reliability in low-connectivity environments.
- **Used Kotlin for implementing alarm systems and integrating** Firebase Remote Config for dynamic feature control on Android.
- **Implemented real-time communication features** using WebSockets and Firebase, enabling reliable data synchronization and live updates.
- **Developed custom Flutter** packages and plugins using Kotlin to integrate native Android capabilities and platform-specific features.
- **Integrated Google Maps with marker clustering** for efficient geolocation data visualization in apps.

Faya dev, Software Developer 06/2023 – 06/2024 | Baghdad, Iraq - Remote

- **Led the development** of a ride-hailing application with real-time location tracking, chat functionality, and trip management using Flutter, NestJS, PostgreSQL, and Firebase.
- **Implemented Android foreground services** to support reliable background location tracking and continuous trip updates.
- **Developed and optimized** e-commerce and ERP applications, improving performance and enhancing user experience across ordering and browsing workflows.
- **Built a comprehensive cross-platform** time tracking system using Flutter and Java, including activity monitoring, HID listener integration, screen capture, task management, work logging, and real-time data synchronization.
- **Collaborated with mobile and backend teams** to design, implement, and maintain scalable application features across frontend and backend systems.

Faya dev, Software Developer Intern 12/2022 – 05/2023 | Baghdad, Iraq - Remote

- **Developed full-stack** mobile applications by building responsive Flutter applications and backend services using NestJS and PostgreSQL.
- **Refactored Flutter application architecture** and state management, improving code maintainability, reducing redundancy, and enhancing application performance.
- **Diagnosed and resolved critical issues** across mobile and backend systems, improving application stability and user experience.
- **Designed and integrated** REST APIs to enable reliable communication and data synchronization between mobile clients and backend services.

EDUCATION

Bachelor of Informatics Engineering, Arab University Of Science And Technology 2019 – 2024 | Hama, Syria

SKILLS

Mobile Development	Backend Development	Programming Languages	Tools & Development Practices
Flutter, Dart, Firebase, Kotlin (Android Plugin Development), Flutter Plugins & Packages, Clean Architecture, State Management, BloC.	Node.js, TypeScript, NestJS, Express.js, REST APIs, WebSockets, PostgreSQL, MongoDB, Mongoose, MySQL, PostGIS.	Dart, TypeScript, Java, Kotlin, C++.	Git, GitHub, GitLab, Bitbucket, Jira, CI/CD, CodeMagic, Shorebird, Code Push, Agile Development, Code Review

LANGUAGES

Arabic	English	Dutch
Native	Proficient	Basic

CERTIFICATES

- Syrian private CPC
- Syrian CPC
