SUMMARY

Over 4 years of experience in IT , Mobile App Developer with a background in Computer and Automation Engineering and a passion for building high-quality, user-friendly applications for both Android and iOS using Flutter. Experienced in state management, API integration, and deployment processes. Known for strong problem-solving skills and a dedication to clean, efficient code.

WORK EXPERIENCE

06.2025 – present	ASINNAH _Academy Flutter Developer ▪ Integrated deep linking for direct course access with authentication-aware routing. ▪ Implemented online and offline access to course content, including video playback and textual documents (PDF and text-based resources), with reliable buffering and enhanced error handling. ▪ Developed and maintained an academic mobile application for browsing, purchasing, and managing full and partial courses. ▪ Successfully deployed the application and ensured stable performance for active users in Homs. ▪ Implemented secure user authentication and account management using Telegram login. ▪ Utilized BLoC (Cubit) for efficient and scalable state management.	fulltime, Homs
8.2023 – 01.2024	National Exam Flutter developer ▪ Made an application for students to practice tests and study materials. ▪ Added personal pages with exam notifications, including for master's students. ▪ Let students share resources and work together to learn better.	freelance, Syria
05.2024 – 09.2024	Velveta Flutter Developer ▪ Users can create accounts and log in securely with email verification. ▪ The app shows a wide range of products with full details, making shopping easy and enjoyable. ▪ Users can add products to their cart with options like quantity, color, and style for a personalized experience. ▪ The app supports favorites lists and secure payments through MyFatoorah, making shopping fast and reliable.	freelance, Syria
09.2024 – 01.2025	Task App Flutter Developer ▪ Users can add, delete, edit, and manage notifications for tasks, activities, and events. ▪ The home page shows completed and incomplete tasks with filtering options for easy tracking. ▪ Google Maps is used to select event locations, improving accuracy and navigation. ▪ The app provides statistics to monitor performance daily, weekly, monthly, or overall.	freelance, Syria

UNIVERSITY PROJECTS

06.2025 – 09.2025	Event Management (Graduation Project) ▪ Integrated Firebase, Google Maps, and Stripe for seamless authentication, location, and payments. ▪ Built an interactive chatbot for personalized event planning and user interaction.
01.2024 – 05.2024	Enaya App (4th Year Project) ▪ Developed Enaya, a healthcare app for the elderly, featuring secure authentication, medication and activity tracking, and personalized health guidance.

- Provided users with accessible disease information and condition-specific support, ensuring seamless management of daily health routines.

TECHNOLOGIES

Design Patterns, Flutter, Dart, BLoC/Cubit, Hive, OOP, HTTP, FCM, Shared Preferences, pagination, Restful API, localization, Unit Testing, Algorithms, Firebase, Google Maps, flutter Animation, Theming, Google Play Deployment, Stripe Payment Integration, clean code, Git & GitHub, problem solving, Postman, team collaboration.

EDUCATION

09.2020 – 11.2025	Homs University Bachelor of information technology engineering ▪ Specialization: Software Engineering and Information Systems.	Homs, Syria
