📍 Hama, Syria | Open to Relocation & Remote Opportunities

SUMMARY

Software Engineer with **4+ years of experience specializing in mobile application development with Flutter**. Experienced in building and shipping **production apps** across IoT, healthcare, ride-hailing, e-commerce, and workforce management, with products reaching **100K+ downloads**. Working knowledge of **NestJS, PostgreSQL, Kotlin, and Edge AI**, with a strong focus on **clean architecture, performance, real-time communication, and offline-first applications**.

PROFESSIONAL EXPERIENCE

Mobile App Developer, *Unifi Solutions*

08/2024 – 08/2026

Montreal, Canada - Remote

- **Improved IoT app performance by 40%** while refactoring a large codebase and adding features. Implemented **WebSockets** for real-time communication with IoT devices.
- **Led the development of a medical app**, building a patient alarm system using Firebase silent notifications, Android Alarm Manager, and Kotlin. Added automatic alarm scheduling and volume control, and developed a **text and voice AI chatbot** for patients.
- **Developed an offline-first maintenance app** with local data caching and data synchronization, allowing users to work when the internet connection is limited.
- Used **GitHub** and **GitLab** for **version control**, pull requests, code reviews, and CI/CD.

Software Developer, *Faya dev*

06/2023 – 06/2024

Baghdad, Iraq - Remote

- **Led the development of a ride-hailing app**, working on both the mobile app and backend. Built real-time location tracking, Firebase Functions, and Android foreground services. Developed separate **Captain and User apps using Flutter flavors**.
- **Led the development of a cross-platform staff management app**, building features similar to Jira and adding employee activity tracking, screenshots, and activity percentage monitoring, with a focus on performance.
- **Worked on e-commerce apps used by 100K+ and 50K+ users**, developing new features and improving existing functionality.

Software Developer Intern, *Faya dev*

12/2022 – 05/2023

Baghdad, Iraq - Remote

- **Built full-stack applications** using Flutter, NestJS, and PostgreSQL as part of a hands-on development program.
- **Refactored an ERP application**, improving its structure, maintainability, and performance.
- **Diagnosed and fixed application issues** across both mobile and backend code.

EDUCATION

Bachelor of Informatics Engineering, *Arab University Of Science And Technology* 🌐

2019 – 2024

Hama, Syria

SKILLS

Mobile Development

Flutter, Dart, Firebase, Kotlin (Android Plugin Development), Flutter Plugins & Packages, Clean Architecture, State Management, BloC, ONNX, TensorFlow Lite (TFLite).

Backend Development

Node.js, TypeScript, NestJS, Express.js, REST APIs, WebSockets, PostgreSQL, MongoDB, Mongoose, MySQL, PostGIS.

Programming Languages

Dart, TypeScript, Java, Kotlin, C++, Python.

Tools & Development Practices

Git, GitHub, GitLab, Bitbucket, Jira, CI/CD, CodeMagic, Shorebird, Code Push, Agile Development, Code Review
